MIREILLE JEAN, QUEBEC'S IT PERSONNALITY OF THE MONTH

Montreal and Chicoutimi, Quebec, Canada (February 16, 2005)—The FIQ recognizes Mireille Jean's performance in Quebec's IT community by naming her "Quebec's IT Personality of the Month for February 2005". This honor is awarded to persons working in Quebec in the field of information technology and communications who have especially distinguished themselves in a given month. "I truly appreciate the honor bestowed on me by the FIQ. This recognition is even more meaningful when one realizes it is awarded by representatives of the industry", stated Ms. Jean.

Vice-President and co-founder of TRIONIQ Inc., Ms. Jean has been working in the business world and in the area of technology for more than 20 years. Responsible for operations and corporate development, Ms. Jean has recently distinguished herself with the signing of a partnership agreement with Caifornia's Silicon Graphics Inc.

"I am very proud of this agreement, which helps us consolidate our position and opens the door to the supercomputer market. However, what I am even prouder of is that a technology, developed here in Quebec, is being implemented by major computer manufacturers and that and will used around the world", added Ms. Jean.

Due to this nomination, Ms. Jean becomes a finalist for the title of "IT Personality of the Year in Quebec for 2005". This honor will be conferred in May 2006 at the OCTAS gala.

About TRIONIQ INC

Founded in 1984, TRIONIQ Inc. is a privately held company headquartered in Chicoutimi, Québec, Canada. Its flagship product MakinaBOX is a patented card carrier mechanism. TRIONIQ's vision is to offer to the industry at large the MakinaBOX mechanism which is a natural answer to the often contradictory needs of micro-electronics, PC packaging and service continuity for computers.
